- **Object Oriented Programming**
- **Database Management:** MySQL
- **Web Development:** HTML, CSS, JavaScript, React
- **Salesforce:** Platform Development Basics, Apex Basics for Admins, Build a Data Model for a Recruiting App, Improve Data Quality for a Recruiting App.

## PROJECTS

**Title:** Recruiting App

**Objective:**

- In recruitment apps, HR professionals can create and manage the company's profile. They can add, delete or update

the company's working conditions, benefits, and location Thus, candidates get all the necessary information and can decide whether they will apply in the company.

- Implemented automated approval processes and email notifications in the Recruiting App, improving communication and decision-making within the hiring workflow.
- Provide security which will access by only the HR not by the employee who does not have any access for the modification of data.

**Title:** Secure Login: Two-Factor Authentication System(2FA)

**Objective:**

- Secure Login is a web application aimed at enhancing the security of user accounts through the implementation of a two-factor authentication (2FA) system. The project aims to provide users with the option to enable an additional layer of security beyond traditional username/password authentication.

**Key Features:**

- Multiple 2FA Methods, User Registration, Secret Key Generation, Login Process, Logging and Auditing

**Title:** Tic Tac Toe

**Objective:**

- The game is played on a 3x3 grid, and the goal is to get three of your own symbols (either "X" or "O") in a row, either horizontally, vertically, or diagonally.
